

FOR IMMEDIATE RELEASE

Todd Dunn to examine how population health management is demanding better UX at DOCSF 2017

Tech Innovator to discuss telehealth, new tools to transform the future of digital patient experience

SAN FRANCISCO, Dec. 5, 2016 – [Todd Dunn](#), Director of Innovation at [the Intermountain Healthcare Transformation Lab](#) in Salt Lake City, Utah, will speak on innovation, technology and user experience in the delivery of digital orthopaedics at this year's [UCSF Digital Orthopaedic Conference San Francisco](#) (DOCSF).

Todd Dunn

"Todd's passion is influencing the strategy, mindset, and toolset that enables effective innovation, and his purpose in innovating is to help people," said [Dr. Stefano Bini](#), Professor of Orthopaedic Surgery at UCSF and founder of DOCSF. "Todd's participation at DOCSF will give us a much better perspective in developing a holistic approach to creating an effective and empathetic user experience in digital health -- and ultimately, engaging the patients we serve. "

Dunn will be participating in a panel discussion entitled, "Reinventing the Delivery Model," which will include Dr. Bini as well as [Jordan Shlain, MD](#), the founder of [HealthLoop](#), the cloud-based platform that automates follow-up care.

"Innovation is taking an idea to a meaningful and measurable outcome for someone who has a job to be done," Dunn said in an interview with [Healthcare IT News](#). ""Population health is turning the tide to make things work the way people want them to work outside the system, but industry is going to have to design solutions that delight people."
